Rough draft trans. of Akademiya Nauk SSSR. Otdeleniye Tekhnicheskikh Nauk. Izvestiya, 1954, no. 8, p. 101-109.

Experiments on the destruction of thin-walled glass and gypsum pipes by internal pressure by the simultaneous imposition of axial elongating or compressing stresses under the maintenance of proportional stress conditions were used to show that the strength criterion during plane stressed state appears to be the most normal tensile stress (first strength hypothesis) and not the maximum elongation or maximum tangential stress. This is true for glass up to a ratio of the main compression (Materials, TT, v. 5, no. 11) (over)
